RL-04
REMOTE LED INDICATOR

This single gang Remote LED indicator provides a universal LED indication of a detector operation when connected to the remote LED output of smoke and heat detectors.

Simple to install on industry standard 60mm screw fixing centres, this LED indicator includes options for 1mA , 2mA and 4mA as standard enabling use on addressable and conventional systems with the same standard LED unit. A high specification LED is used to maintain visibility at low currents and wide angles.

Uniquely, this product has a constant current circuit so that data corruption on addressable systems is avoided.

Key Features

Constant current
Universal use across system types
Installer selectable current consumption 1mA, 2mA or 4mA

Quick installation
Side cable entries on flush mount unit
Low power consumption
Standard fixings

Product data

Material	White ABS
Body colour	White
Connection input	5V to 50V
LED current	User selectable 1,2 or 4 mA
Fixing methods provided	2 x M3.5 x 30mm screws or 2 x 30mm self drilling screws
Application type	In door use
Connection type	Screw terminal up to 1.5mm²
